May 6, 2016

Dear Tennis Court Key Holder,

Effective May 17, 2016 you will no longer be able to access the Mason Creek Community Center tennis courts using the key you are currently issued. The standard key and locks will be replaced with a new electronic key card access system.

You can bring your current key and identification to the district office located at 847 Dominion to exchange for a new key card starting May 10, 2016. Your previously paid tennis key deposit will be credited to the new key card at no expense to you.

To limit the inconvenience for valid key holders, there will be no locks on the courts for 5 business days the week of May 9th, allowing time for everyone to exchange their keys. After May 16, 2016 only individuals with the new electronic key card will be able to access the courts.

A big advantage to the new key card system is the ability to enable and disable access for specific users as needed. There have been a significant number of complaints about residents being turned away from the courts by tennis pros providing instructions. In most cases these tennis pros do not have authorization to be providing lessons on these courts.

The district is also installing new gates and commercial grade closure devices to help avoid the gates getting propped open and allowing access to unwanted guests. Anyone caught in the act of propping a gate open will immediately lose their privilege of access to the courts.

For additional security, a series of new surveillance cameras are being installed to monitor each of the entry and exit gates. All of these measures are being completed to better serve the users of the tennis courts.

Sincerely,

Mason Creek Utility District
